## NEW GENOMIC SIRES

**RIDLEY**

**O Malley x Vanpari x Payssli**

This new bull is out of the famous line of the bull Antonov, his half-brother! This very early O Malley son has an ideal package for commercial farms looking for medium sized cow, with the great power of components of Brown Swiss and all the desirable fitness traits: he is a top fat% sire, super calving ease, high daughter fertility, fast milking speed and of course he will bring the sweet udders for a long productive life. With such a profile, he matches perfectly also any crossbreeding programs. With 1471 GZW he is at the very top of the Swiss list, also and 183 PPR. He is BB and A1A2, already available now both conventional and sexed, qualifies for USA/CAN.

RIDLEY

**PAVOISY**

**Malcolm x Verdi x Glenn**

PAVOISY

It is the only son of Malcom (an Anibal son from BGS), that comes from a new cow family with strong foundations. He combines interesting quantities of protein and fat kg, with good functional traits and complete type profile. He is one of the rare complete bull that can really improve teat size when becoming too thin and short is a problem! His dam VG 85 produced in 3rd lactation 10252 kg at 4.84 %F and 3.89 %P, and his Glenn EX 90 grand dam 9733 kg at 4.16 %F and 3.82 %P! He is 1373 GZW in Switzerland, also 1015 ITE in Italy. A very complete package with BB and A2A2, available sexed. Conventional semen in limited amounts for the moment.

## RAMSES

### Antonov x Hugor FBS x Shottle

Another bull that comes from a new cow family, an example of BGS philosophy to build on cow families that work very well at home and that can transmit high breeding values. His great grand dam, a G+84 Vasir, achieved 8 lactations, his grand dam (VG 88 Shottle) is starting soon her 5th and dam (VG 85 Hugor FBS) is starting her 4th lactation! They all show a lot of body capacity and will to produce, most of the herd hails from this cow family, a good sign of longevity. Ramses has a very unique combination of high fat% with high milk yield and excellent daughter fertility! When you wish to improve fertility without sacrificing the rest, don't miss him. He is 1354 GZW CH, also and 181 PPR. An original package with BB and A2A2, available sexed and conventional now.

*aAa: 162534*

RAMSES

## TOP GENOMIC SIRES

## PISTON

### Bays x Jaguar CH x Hapat

He remains our highest ISU sire with 184 pts! His sire Bays gained many daughters in milk and keeps a high level, with now high reliability. Piston is the first bull to be released from this cow family that incredibly combines very high production, components and type. Piston has a really complete profile and will add very good udders with ideal teat size and position. He is 1372 GZW in Switzerland, 126 GW in Germany, BB and A2A2, available sexed and conventional.

*aAa: 165243*

Ness , PISTON'dam

## PARADOR

### Bays x Amor x Glarus

With a similar profile to Piston, he comes from the famous Tigelle cow family, that is still the highest active lifetime production cow in France. Parador will transmit the high quality of udders of his maternal line, with a balanced frame and high combination of components and production. He ranks at the top in all countries with 1387 GZW CH (1st Bays son), 1017 in ITE, 127 GZW DE and 178 pts of ISU in France. He is BB and A2A2, available sexed and conventional  
*aAa: 651423*

PARADOR

## ROCKY

### Canyon x Blooming x Vivid

ROCKY

This Canyon son ranks very high in all countries: 1418 GZW CH, 1182 ITE and 173 PPR. One of the highest sire for combined fat and protein kg, with over 1500 milk, positive F% and high %P. Such high production with a positive daughter fertility is not so common along with nice frames and depth of ribs, width of udder. Fast milking speed, very easy calving, he is also BB and A2A2, well available sexed and conventional.  
*aAa: 156324*

## ROMARIC

### No Decibel x Loustic x Falk

He is the type specialist of 2021 BGS line up with still +1.8 overall type, coming out of Patrice cow family. Romaric will add good components, stature and style, strong feet and legs and very snug udders. Teats are ideal in size and position, he is BB and A2A2, available sexed and conventional.  
*aAa: 621453*

Oula GP, ROMARIC's dam

## PHENIX

### Narcotic x Hamster x Espoir

PHENIX

He keeps his high level of ISU above 171 pts with a complete package of components, type and super fitness traits, especially daughter fertility. Bringing an alternative in his sire stack, he is going to make strong cows with super top lines and ideal teat dimensions. He ranks very high also in PPR (205 in April 2021). He is AB and A2A2, and available sexed and conventional.

*aAa: 243615*

## PACTOLE

### Blower x Fact x Zephir

For the second run he keeps #1 position for PPR in USA of available bulls in US, going up at 204 pts! In Italy he still ranks in the Top 15 of genomic sires at 1140 ITE. A remarkable sire to bring sky high components, top functional traits, fast milking speed with nice udders and great feet and legs. Pactole is BB and A2A2 and widely available both conventional and sexed.

*aAa: 243615*

Musolde, PACTOLE's dam

## OPTIMAL

### Sinatra x Blooming x Vigor

Mana, OPTIMAL's dam

He is certainly the best Sinatra son you can find! The great foundation of Fiona family is at work with Optimal to bring you the ideal combination of high production, good type and long lasting cows. He is #4 available sire in Switzerland with 1467 GZW and 128 in udder. The second most used bull in France after O Malley! He is BB and A2A2, available both conventional and sexed.

*aAa: 156324*

## O MALLEY

Bender x Glarus x Dally

No need to present him...maybe the most used sire of sons worldwide in the last 2 years, with many top sons soon available! O MALLEY is still 149 PPR, 1402 GZW, 123 GZW and 1006 ITE. O Malley offers like no others the real complete package, making his success: high type, sound milk volume with high components, top fitness traits, fast milking speed and easy calving! His dam was recently pictured in 3rd lactation, a super balanced cow! He is BB and A2A2, widely available both conventional and sexed  
*aAa: 423561*

Lilipus, O MALLEY's dam

## TOP PROVEN SIRES

### MATHIEU

Halleluja x Anibal x Talc

Magie, MATHIEU's full sister

He starts to add milking daughters in his proof and remains at a high level of ISU with 156 pts! He is going to bring superior components, excellent daughter fertility, powerful frames and feet and legs. He goes back to the famous Urgele (Vinozak) with 123 142 kg lifetime production. We look forward for more daughters to consolidate his very interesting start. He is 1284 GZW CH, also 989 in ITE and 161 in PPR. He is available in conventional semen only.

## LUTHER

### Bradley x Anibal x Hucos

His first milking daughters are very uniform and pleasant, Luther is a bull that delivers really nice bodied cows, plenty of strength, width and depth, moving on great feet and legs. They show also very good milk production with balanced components. He is very complete in all traits and improves daughter fertility. He is still 1297 GZW CH, 118 GZW DE, also 823 in ITE and 144 PPR, and has already several sons in AI abroad, proving his great transmitting ability. He is available in conventional semen only.

His daughter Ombrelle won the spring Miss BGS online contest

Ombrelle, LUTHER's daughter

## NEW ORIGINAL BRAUNVIEH SIRE

### RUSTIC OB

### Orelia x William x Lorenz

After Jaca OB and Pipeur OB, a third Original Braunvieh sire is now available from France! This Orelia son offers good breeding values expressed in Original Braunvieh dual purpose base population. He is born on the same farm as Jaca OB, from a different cow family, with also high fertility and longevity. Rustic OB shows a good milk potential, good udder health and fertility. He will improve rump and heel depth, with functional udders. With his good calving ease, he can be used for crossbreeding too. He is AB and A1A2 and available both conventional and sexed.

RUSTIC OB
