HOLSTEIN PROOF RELEASE

THIS AUGUST RELEASE HIGHLIGHTS OUR GENETIC EFFICIENCY

- Through the **DIVERSITY** of our offer (*diversity of genetic profiles and evaluation systems*)
- Through the **EXCELLENCE** of our bulls' genetic level (*2 bulls > 900 NM\$ and 15 bulls > 200 ISU*)
- Through the **RELIABILITY** of our genetic evaluation model (*convergence of North-American model towards French model for the Fertility trait*)

ABOUT US PROOFS: 3 BULLS > 2700 GTPI and 7 BULLS > 800 NM\$

NACASH: BREEDERS' MONEY MAKER

+2785 GTPI - 904 NM\$

SUPERHERO x VG85 RUBICON x VG86 ALTAOAK

International sire of sons, NACASH has been widely used in France, in Europe, in North-America, in Australia and worldwide.

His particularly balanced profile and his **performances in various evaluation systems** have made him a very attractive bull that has been used by many breeders and breeding companies.

This amazing son of SUPERHERO is perfectly balanced in all traits. He will **increase the breeders' income** thanks to **high milk solids** (+148). He combines a good fertility (+1.5), transmitted by his strong maternal line from **UNICORN BLACKSTAR LILLY VG87 family** and a faultless functional type (+2.4). He provides outstanding udders (+2.4) supplemented by ideal feet and legs (+1.5). His superb calving ease (+6.8) makes him easy to use on heifers.

NACASH is preceded by an impressive line of Gold Medal Dams and Dams of Merit, **classified VG and EX for 10 generations**.

His maternal strain has consistently **transmitted high components** within generations. His dam FUSTEAD RUBICON LAVON VG86 produced 13 916 KG of milk in 305 days at 4.8% fat and 3.2% protein.

He is now available in **conventional semen** at commercial price and **on order in sexed semen**.

NOTTINGHAM stays incredibly stable with 903 NM\$, just like his brother **NEMON** with 2720 GTPI. They both combines high production (> 1600) and components (> 150) with solid and functional udders (> 2.0) to handle this production.

We are happy to see the bulls **NAXEL, NAMASTE** and **NIKLY** remain as competitive as ever (>800 NM\$). They represent modernity and functionality and are ideal to build healthy and long-lasting cows (> 5.5). They bring good fertility (>1.0), easy calvings (<7.0) and a balanced type supplemented by solid feet and legs (>1.0).

NOTTINGHAM, NAXEL and NIKLY are all available in conventional AND in sexed semen.

A DIVERSIFIED AND COMPLETE RANGE OF NEW ISU BULLS

EVOLUTION BULLS = 31% OF INTERNATIONAL AND 53% OF FRENCH ISU RANKING

Dam : Lantern

NEESKENS: LEADER IN MILK PRODUCTION

PLUMBEO x ITINERIS x FENUGREC

NEESKENS remains in the TOP 10 ISU available and among the best in milk of its generation. He stays incredibly stable and still perfectly combines production (+1402) and functional traits. He comes from the same family as MIVOUACK. This strain was hardly worked in France and produces modern and functional bulls with original pedigrees that make them easy to mate. He is now available in conventional and sexed semen.

OUED is newly coming in conventional semen. With an outcross pedigree and an incredible milk level (+1476), he provides the complete production package with high solids and excellent udders (+2.6) to produce lastingly.

OUED: EXTREMELY FUNCTIONAL

SURGEON x HOTROD x SHOTGLASS

OUED perfectly combines milk and components. He is very functional and holds all the needed assets for grazing systems. He provides perfect feet and legs with an excellent resistance to non-infectious lesions (+1.4) so that his daughters have 30% less risk of triggering lameness. He also provides good fertility (+2.2) and healthy udders (+2.5) to his daughters. OUED comes from the highest herd 2019 in ISU and a leading family that marked genomic selection. Indeed, his great grand dam is LOUXOR's dam. He is available in conventional semen.

Dam : Meuse

Dam : Madonna

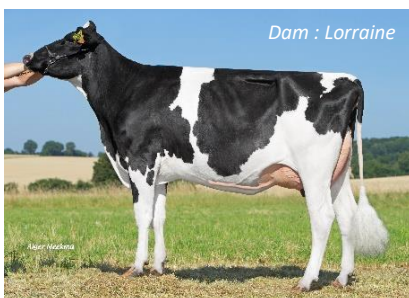

OLSTAR P: INCREDIBLE MILK SOLIDS MAKER

CLASSIC OC x VG86 ABS SILVER x VG85 EARNHARDT

OLSTAR P provides huge components (+0.31% PROT) while maintaining high milk level (+846). This polled bull has no faults and is perfectly balanced. He will build strong (+1.6) and wide cows with functional and healthy (+2.4) udders. OLSTAR P comes from the well-known ISITOLO' family by his 3rd dam DAPHNE. His sister was #1 ISU polled in France last April 2019. This renowned strain perfectly transmits its genetic potential from generation to generation. He is available in conventional semen.

LOUXOR still remains stable. He progress in milk (+1000) and he stays very well-balanced. He currently have few milking daughters now and we are looking forward to know their performances. His sons like NERON, NEWSTAR, NIVERNAIS, NOUXOR, etc. are also doing well and still stay very high in the ranking.

Dam : Lorraine

OHEME: EXCEPTIONAL PROTEIN AND MILK

ADAGIO P x VG86 ABS SILVER x VG85 GASY

OHEME is the only bull available in the French ranking capable to combine high potential of protein (+3.0) with enough milk (+781) and a strong type (+3.4). OHEME will be your perfect partner to progress on feet and legs (+2.0) as in hoof health (+1.1). Positive milking speed, good fertility and mastitis resistance are TOP additional values to breed easily strong and productive cows. This amazing bull is available in conventional and sexed semen.

ORLY, another son by ADAGIO P is also a newly coming in conventional and sexed semen. His grand-dam is LOUXOR's dam, which is a guarantee of excellence. He brings perfect functional traits and a balanced milk production.

FRENCH QUALITY AND RELIABILITY WITH NEW PROVEN BULLS

We are happy to see the bulls JOYSTAR, JAMES BOND and JACTIVE become proven with proofs still as good as ever. They are all very well-balanced and modern bulls which have been used in quantity in France and all around the world.

JACTIVE is the #2 French proven bull with 182 ISU points. With +1110 in milk, this bull from LOUXOR strain offers productive cows that perform well in breeding, in France and worldwide. He is functional and builds healthy cows which last in herds. We can affirm that males and females from LOUXOR family confirm their potential, and we look forward to seeing him be proven in turn.

JOYSTAR also remains very incredibly stable in his production traits with +1183 in milk and very balanced components. He is the ideal bull to increase breeders' income thanks to volume and richness of milk. His daughters are very appreciated by their breeders, they are functional, robust and very well-balanced in their morphological profile. Lastly, they have all the needed assets to last in herds.

Finally, **JAMES BOND** is also one of the TOP proven bulls of this new proof run.

With incredible solids, especially in protein (+2.9), he is the ideal bull to increase the milk added value. With a high resistance to mastitis (+2.1), his daughters produce high quality milk as well as being rich.

Regarding morphology, they are strong (+1.8) with solid feet and legs (+1.1) and are globally very well-balanced.
